There is a section of conduit that was installed by means of a directional drill that encroaches on the wall by Anderson Park. City of Redmond excavated a section (See attached photo-Exhibit A) and found a cavity had formed around the conduit. Zayo is proposing to excavate the encroaching conduit and determine if any other cavities have formed. If said cavities are found Zayo would like to fill with a CDF (**Controlled Density Fill**) mixture that would fill the void, harden and stabilize the area under the wall.

Exhibit A – Shows void around conduit

Exhibit B – Section of Wall Zayo will be locating to determine areas of encroachment

Exhibit C – New conduit and Vault installation as part of the Joint Trench

Scope of Work:

- Have conduit located to determine extent of the encroachment
- Qualified preservation control person on-site to monitor
- Hand dig-Carefully-to expose conduit to determine if voids exist
- If void exist fill with CDF.
- Remove fiber optic cable from conduit and fill conduit with CDF.
- Participate in Joint Trench "Couplet Conversion Project"; installing a new conduit and fiber in City of Redmond right-of-way.

Sincerely,

**Scott Morrison**

Director, Zayo
