

Two-way Street Conversion

This project will upgrade utilities and convert both Redmond Way and Cleveland Street to two-way traffic, creating better access for residents and businesses.

- Location:** Redmond Way and Cleveland St from 160th Ave NE to Avondale Way
- Project Phase:** Under construction
- Estimated Timeline:** Design 2013-2015, Construction June 2016 through end of 2017
- Contact:** Jill Smith, Downtown Outreach, 425-556-2448 • Lisa Singer, Project Manager, 425-556-2723

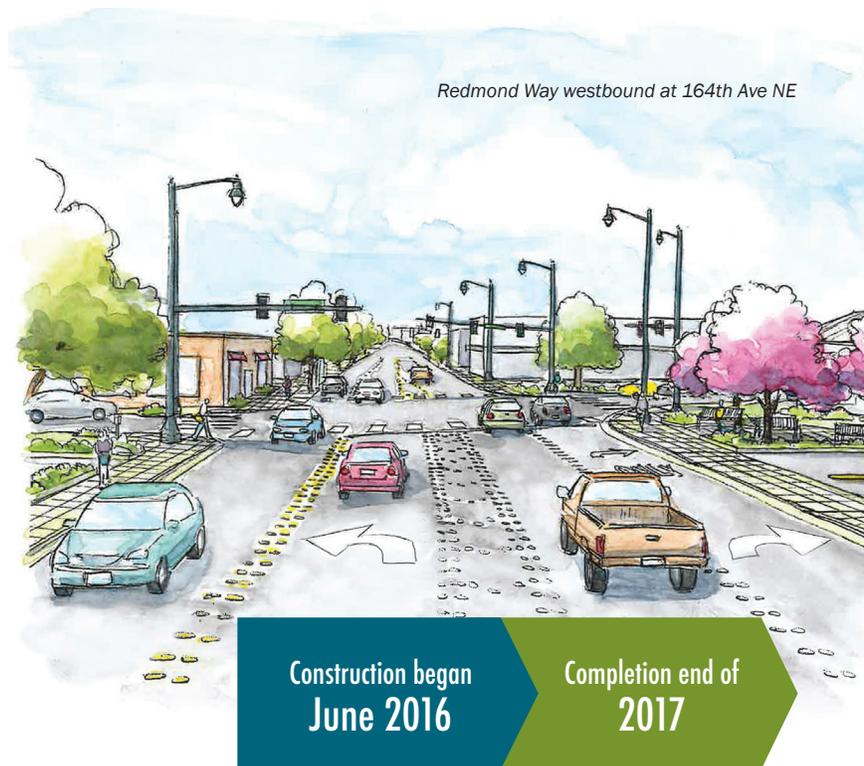

The conversion will make Downtown easier to navigate and more connected, whether you are driving, walking, biking, or taking transit. Cleveland Street is designated as Redmond's signature "main street" while Redmond Way will carry the majority of traffic as the main arterial through Downtown. This project is the completion of the planned transportation grid in Downtown, which included the sequencing of six major roadway and utility infrastructure projects over the past six years.

The following work will occur at the eleven intersections:

- Replacing old utilities (water, storm)
- New traffic signals, lighting, and sidewalks
- Undergrounding of overhead power and communications
- Paving and landscaping
- New plazas near Anderson Park

Work between the intersections includes:

- Reconfiguring lanes
- Updating street signs
- Remaining sidewalk and parking improvements between intersections will be constructed later as private development occurs

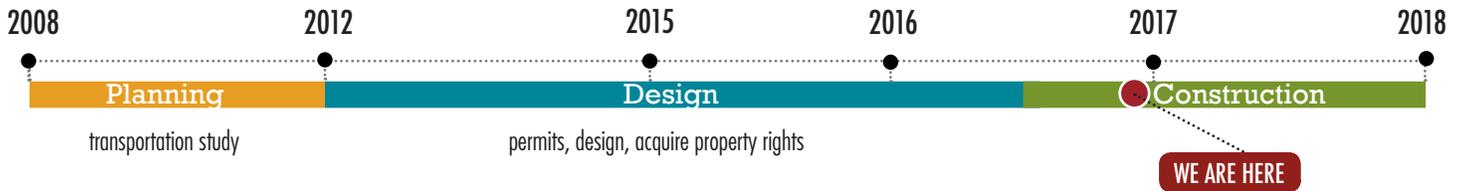

Maintaining access to businesses and adjacent properties will be a priority during the project.

Project Timeline:

Project Costs:

Total:	\$27.0 million
City General & Utility Funds:	\$ 2.8 million
Other Funding:	\$24.2 million

Recent Activities:

- Construction third phase will begin in December with the start of undergrounding work for the overhead utilities and installation of new sewer.
- Coordinating weekly with adjacent developers and utility companies on construction activities, schedules, and access.
- Redmond Way reopens to two lanes in November, with occasional daytime closures to one lane.
- Construction second phase is nearly complete with the installation of new water main on Redmond Way between 164th and Avondale Way.

What's Happening Next:

- Project impacts are constantly changing. Find updates and the option to sign up for project and construction news below.
- Foundations for new traffic signal poles are being installed.

Neighborhood Impacts:

- Construction activities continue to ramp up during the fall 2016, including underground utility work.
- Construction impacts mostly occur during the daytime and may include lane closures and some construction noise. However, occasional night work is anticipated.
- Traffic impacts from construction activities include the temporary closure of the south end of 168th Ave NE during construction. Redmond Way from 164th Ave NE to 170th Ave NE will be one lane 24/7 through fall 2016. Businesses impacted by temporary cut overs of utility work will be notified.
